## THE CONFERENCE SERIES

A wide selection of Conference Tables for productive meeting

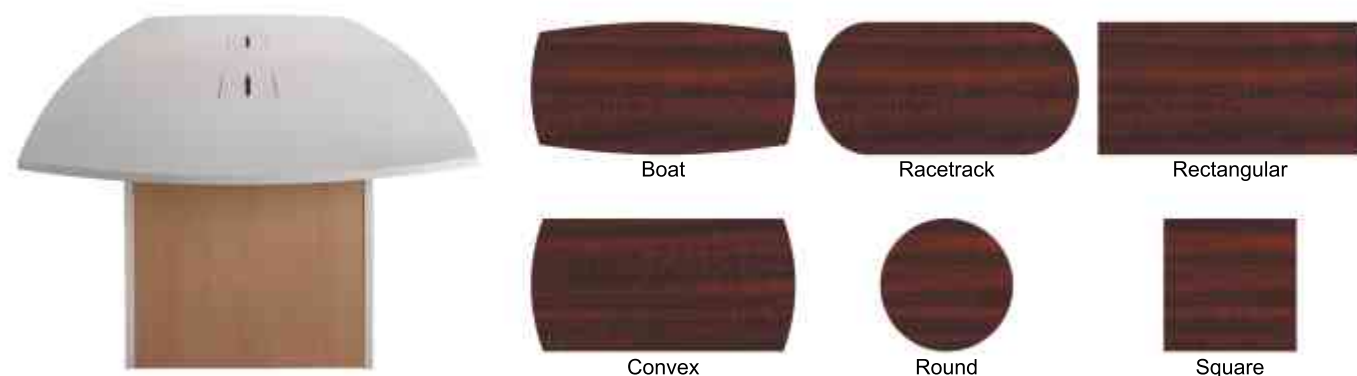

## Conference/ Board Room Furniture

We offer custom made sizes according to your room

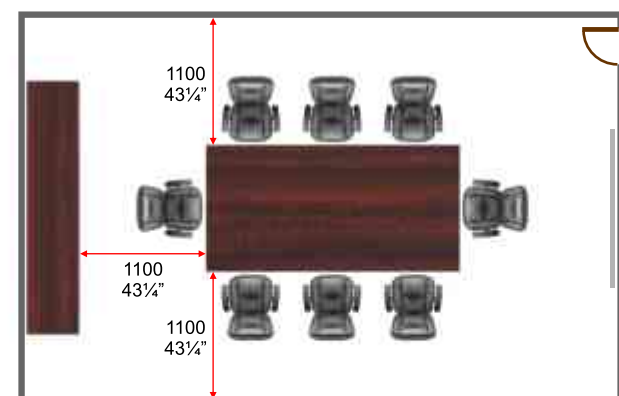

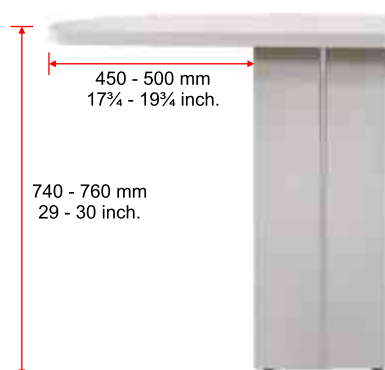

**Find the Shape that fits your needs:**

#### Custom Made Conference Table

Conference tables can have different shapes and sizes you could need. Ideally, all table tops hang at least 450 to 500mm (17¾" to 19¾") over each end of the table base. If the conference table top needs to join together with three or more to create a larger surface that allows to the custom size of your conference room. Our craftsman will analyze with your required measurement, in case if your table leg room is limit to the length that may cause concave functions to the table top, epoxy metal crossbars will be fixed underneath to ensure a long lasting strength that guaranteed the table top from changing shape against concavity.

Mostly tables are 740mm to 760mm (29" to 30") high from floor to table surface. This works well because chair seats are approximately 410mm to 500mm (16" to 20") high off the ground. All bases equipped with adjustable leveling guides to keep the table stable from unevenness of the floor.

#### Conference table size

How large is your conference room? The size of your conference room and other furniture in it will guide you in selecting the maximum size of your table. To do this, measure the distance between walls (or the front edge of other furniture placed along walls) and deduct 2200mm (Approx. 87") is recommended.

This is the maximum table size the room can accommodate, you must allow about 1100mm (43¼") of space between all edges of the table and wall (or furniture front edge) so users can pull out their chair and be seated, and also provide a comfortable walkway behind a seated person in the room. This rule applies to most all table shapes.

#### What Style of Conference Table Should I Select?

##### Seating arrangements

Consider a table that can provides ample workspace for each user, and fits comfortably in your conference room. All conference table seat people along their outer edges, therefore seat comfort is best achieved for each place requires at 900mm (approx. 35½") wide of space for elbow-room, seating and foot traffic around sides of the conference table, or kept to a minimum of 800mm (32") wide per seat is enough if space is limited with petite chair.

#### What is the maximum number you would like to seat at your conference table?

More often, it depends on the chair width. No matter which chair size you select, you should take note of the range on the seat width sizes. The wide of the chair make a big difference including armrests. There is no standard office chair size, because of that, add 150mm (6") wide to each chair's to accommodate the spaces between each other. Each seat width with each other is the distance from armrest to armrest. So you should know how many people does your table need to seat?

If you're uncertain of what size to place your order, then leave it to us for the dimensions. Call our customer service experts for assistance with space planning and design of your custom made conference table. The style of today. All material is carefully selected to ensure they are superior in every way.

# CONFERENCE SERIES

Optional cable grommets and data/power modules sold separately below.

Grommet comes with Double Door Modules.

Doors open for excess cabling, remotes, or other accessories.

### Double Door Modules

The Double Door Modules is fixed with concealed hinges, a solid wooden surface grommet placement. The grain of the doors runs with the grain direction of the table top. It allows all wiring or data cables to be concealed and managed underneath the table top through the Cable Rails Compartment and brings the power to the proper location.

### Netbox Turn

Netbox Turn is a built-in unit that rotates around a central axis in order to either expose or conceal the socket outlets. When rotated to the "closed" position, the unit sits flush with the surface into which it is mounted, making it ideal for applications where it is not always desirable to have the power. Cables run underneath the table.

### Panel Mount Console

Panel Mount socket console is flush-mounted to the surface and provides easily accessible location for the needs of modern office working desk without the need for any modification to the furniture. The console is made from high quality aluminium alloy with able to accommodate power and telephone. LAN, USB, HDMI, VGA and other modules according to your personal requirement. Cables run underneath the table.

### Flipper Box

The Flipper Box is an elegant and neat solution to house standard dry wall 13A sockets in a self-contained case that can be used in any location. The box can be mounted under a work surface while the "Flipper" cover conceals the sockets surface. It also caters for managing excess cable. Cables run underneath the table.

### Flipper Cover

The Flipper Cover is a multi-purpose cover. It's designed to be mounted to a work surface allowing access to any console or product below it. The cover neatly conceals the opening in the work surface whilst allowing the cables to pass neatly underneath the table top.

### EX 11 Vertical Cable Guide (under the desk)

Keeps cables organized and out of the way, no more tangled messes on your floors! With these vertical cable guides, powering your electronics is simpler than ever, designed to fit into grommet holes or solid surface finishes.

**D 22** Slender Universal Pedestal base is designed for 1200 to 1500mm (47¼" to 59") width table top, and is designs to work with the Cable Rails Compartment. If wire manager is needed for this base the Cable Rails Compartment and Vertical Cable Guide have to be installed underneath the table top to organize wire/cable to go through the Cable Rails for managing power or data cables, or other accessories.

Top and Bases sold separately, Slender Pedestal Bases are used for outside and center bases, fixed with 80mm grommets on both sides in the upper part, to allow power and data cables to pass through the Cable Rails Compartment on either side. This option is good when you apply for an extension in the future. Measurement: 155 mm (6 inch) Width

**D 33** Universal Pedestal Base comes with 80mm grommets on bothside in the upper part completely prepared with access for wire management to be concealed from the floor to the Cable Rails Compartment with a clean look, and bring the power to the proper location. **Important Notice:** If you would like to replace or extend a new table top after your purchase few months ago or within a few years. One of the difficulty of rework that goes into getting the right color replacement from an older ones. However, sometimes the colour/tone will not perfect match previous purchases product. Due to direct effect or impact on colour fade, and aging, the colour/tone will appear inaccurate over time than what you are expecting. Just like other dyed products, such as fabric. All incoming materials come varies in colour from batch to batch. To ensure the best results, all materials for a project should be ordered at the same time and use the same batch with processing systems.

Your Conference Table is custom made to order especially for you and cannot be cancelled once manufacturing has commenced. We are happy to provide colour samples on the actual wood for you to inspect and help you make your selection. These products are non return or refundable unless damaged or faulty. Damages should be reported to us immediately.
